

Flyer HST

High Speed FIX Transformation Software and GUI

Managing custom tags, unexpected formatting changes, and suppressing values in a mission critical environment is challenging. With Flyer's HST, you can manage your FIX world precisely, saving time while keeping your business moving during the trading day. No programming is required.

Customizable FIX translator compatible with multiple FIX engines

- | Add, replace and delete FIX tags and content without slowing down FIX processing
- | Easy to normalize FIX traffic in real-time without starting and stopping your engine
- | Edit and deploy new transformations with our graphical user interface, our command line interface, or manually modify and reload your XML files
- | Drastically simplifies certification and support for your highest value, unique connections
- | Keeps upstream applications free from time-absorbing exception handling routines
- | Huge reduction in development costs and time to market
- | Built-in translations between FIX versions brings clients on-board faster and connects anywhere, including stateful conversions like version 4.0 to 4.4

- | Transformations compiled into byte code to optimize FIX processing speed
- | Supports transformations for all versions of FIX increasing your counterparty reach
- | Integrated into our Daytona™ monitoring framework
- | Our innovative development process allows us to quickly adapt to market changes and trading opportunities

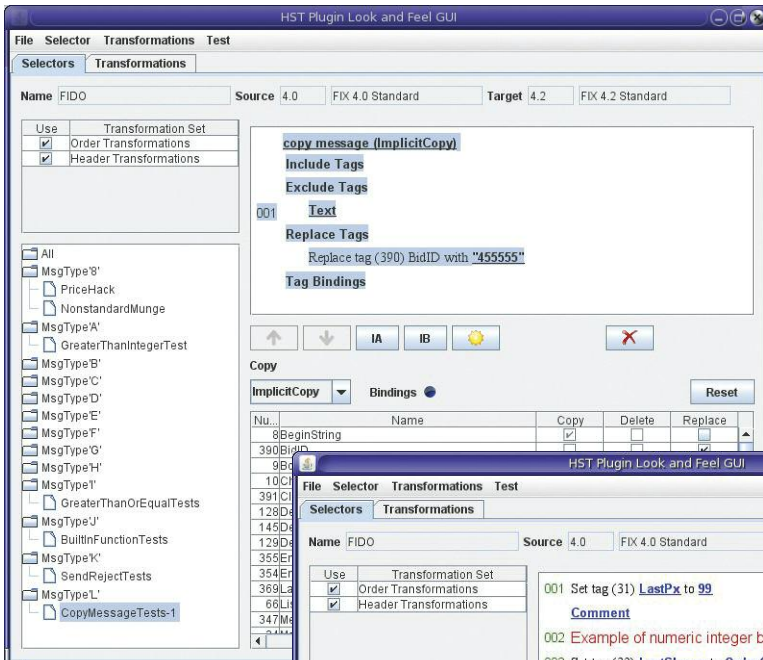

Optional Ultra Low Latency FIX Engine

- | Over 30,000 messages/second per engine on a single CPU with sub-millisecond latency
- | Architected for scalable and mission critical high speed electronic trading
- | Highly available clustering scales to thousands of connections creating non-stop service without any additional investments in infrastructure
- | Thousands of connections per engine with deterministic performance and no garbage collection

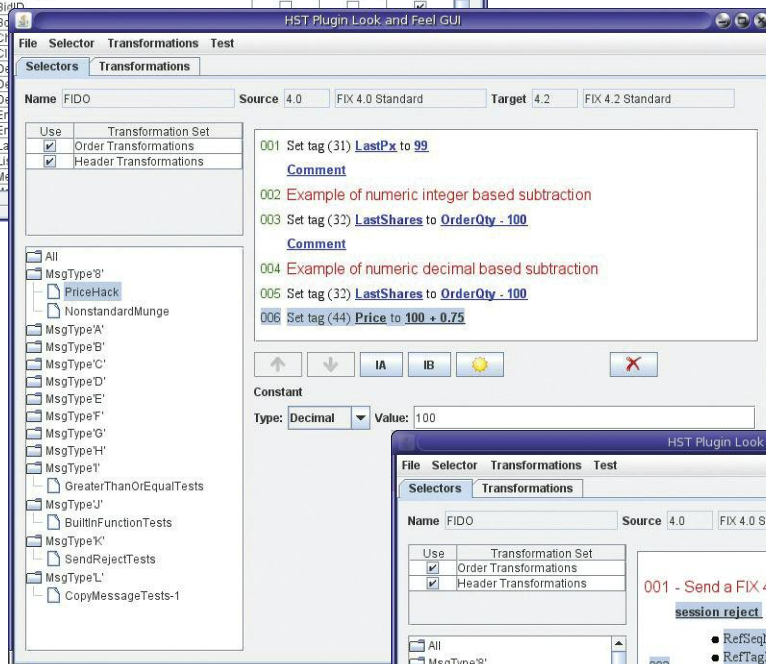

Developed by Leaders in FIX technology

- | Manage your FIX world using Daytona™ our GUI monitoring framework
- | Includes FIX monitor, blotter, configuration interface, log search tool, log analyzer software, latency reports, and FIX statistics all in one tool
- | Compatible with multiple FIX engines
- | Used by our own Managed FIX and FTN services supporting millions of messages per day
- | Professional support staff available for monitoring, certification, complex translations, software consulting and problem resolution
