

FIXFlyer Monaco

Trade Intelligence

Transparent and Efficient Enterprise Liquidity, Profitability and Risk Intelligence for Fast Markets

Monaco gets mission-critical trade data directly to your business users. Traders, analysts, operations and management use Monaco to track profitability, risk, trading efficiency, missed opportunities and firm-wide activity historically and in real time.

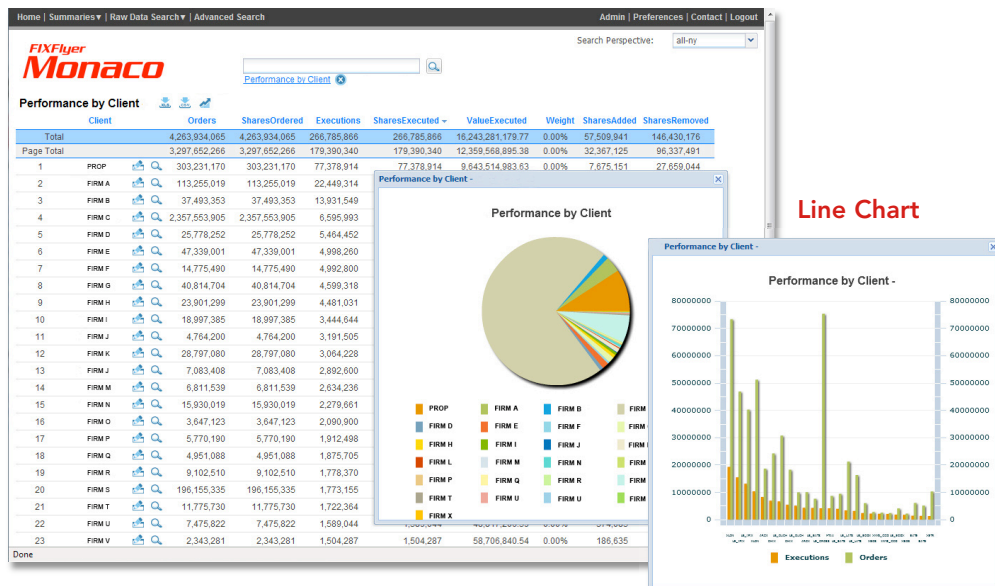

Comprehensive Views for Efficient Trading

- Find missed opportunities to cross trades by client and symbol
- Discover your highest activity by client, symbol and venue
- Evaluate performance by client, symbol, sector and venue
- Analyze order chain efficiency and examine end-to-end latency to relieve impediments for optimal trading

Empowering the User

- Find the answers you need easily with our advanced interface
- Rearrange columns and control formatting as you wish
- Design your own reports and apply data sources from our powerful GUI tool
- Eliminate unproductive design meetings with IT
- Export results to Excel, PDF, or CSV to collaborate with clients and colleagues
- Protect sensitive information on a per user basis with robust entitlements

Performance

Transparent and Efficient Information Discovery

- | Automated views, full transparency, actionable analytics and visualizations delivered in real time
- | Aggregate disparate trade repositories from databases and FIX infrastructures into one easy-to-use system
- | Apply updates with the speed and complexity your business demands
- | View usage statistics to find out who, what, when and where your reports are used

Charting and Visualization

- | One click pie charts, bar and line graphs to help visualize any data set
- | Powerful Heat Maps designed to make it easy to find exceptions in your information

Technology

- | Advanced architecture brings speed and flexibility over and above existing database technologies and SQL interfaces
- | Designed to maintain a consistent user interface firm-wide
- | Easily scales with commodity hardware and inexpensive storage

Main Summary Page

The screenshot displays the FIXFlyer Monaco software interface. The top navigation bar includes 'Home | Summaries | Raw Data Search | Advanced Search' and 'Admin | Preferences | Contact | Logout'. The main header features the 'FIXFlyer Monaco' logo and a search bar. Below the header, there are sections for 'Browse Latest Reports' and 'Highlights'. The 'Highlights' section shows a table with columns for 'Report' and 'Top Value'. The 'Browse Latest Reports' section lists various reports such as 'Missed Opportunity By Client', 'Missed Opportunity By Symbol', 'Most Active Client Order Router', etc. The 'Browse Latest Data Sources' section lists 'Raw Data', 'Dark Pool (Old)', 'Order Router (Old)', 'Execution Router', and 'Order Router'. The 'Watchlist' section lists various reports. The main content area shows a 'Missed Opportunity By Client' report with a table of data. The table has columns for 'Client', 'RouterADV', 'PctRouterADV', 'ADV', 'QuantsADV', 'LiquidityPartnersADV', 'CostExchangesADV', 'PublicExchangesADV', 'PctADV', 'PctQuantsADV', and 'PctL'. The table lists various clients and their corresponding values. Below the table, there is a 'Heat Map' visualization showing a grid of colored cells representing data points. The heat map is titled 'Missed Opportunity By Client' and has columns for 'CLIENT_ACRONYM' and 'SYMBOL'. The cells are colored in shades of red, green, and blue, indicating different levels of activity or risk.
